

8-Channel, Dual 4-Channel, Triple 2-Channel (Triple SPDT) Multiplexers

DESCRIPTION

The DG4051A, DG4052A and DG4053A are high precision CMOS analog multiplexers. The DG4051A is an 8-channel multiplexer, the DG4052A is a dual 4-channel multiplexer and the DG4053A is a triple 2-channel multiplexer or triple SPDT.

Designed to operate from a + 2.7 V to + 12 V single supply or from a ± 2.5 V to ± 5 V dual supplies, the DG4051A, DG4052A and DG4053A are fully specified at + 3 V, + 5 V and ± 5 V. All control logic inputs have guaranteed 2.0 V logic high limit when operating from + 5 V or ± 5 V supplies and 1.4 V when operating from a + 3 V supply.

Channel leakage is typically in the range of 10 pA, and switch charge injection is less than 0.5 pC. Coupled with very low switch capacitance, these devices are ideal for high precision signal switching and multiplexing.

All switches conduct equally well in both directions, offering rail to rail analog signal switching and can be used both as multiplexers as well as de-multiplexers.

The DG4051A, DG4052A and DG4053A operating temperature is specified from - 40 °C to + 125 °C and are available in 16 pin TSSOP and the ultra compact 1.8 mm x 2.6 mm miniQFN16 packages.

FEATURES

- + 2.7 V to + 12 V single supply operation
- ± 2.5 V to ± 5 V dual supply operation
- Fully specified at + 3 V, + 5 V, ± 5 V
- 100 Ω maximum on-resistance
- Low voltage, 2.5 V CMOS/TTL compatible
- Low charge injection (< 0.5 pC typ.)
- High - 3 dB bandwidth: 330 MHz to 700 MHz
- Low switch capacitance ($C_{S(off)}$ 3 pF typ.)
- Excellent isolation and crosstalk performance (typ. 47 dB at 100 MHz)
- 16 pin SOIC, TSSOP and miniQFN package (1.8 mm x 2.6 mm)
- Fully specified from - 40 °C to + 85 °C and - 40 °C to + 125 °C
- Compliant to RoHS directive 2002/95/EC

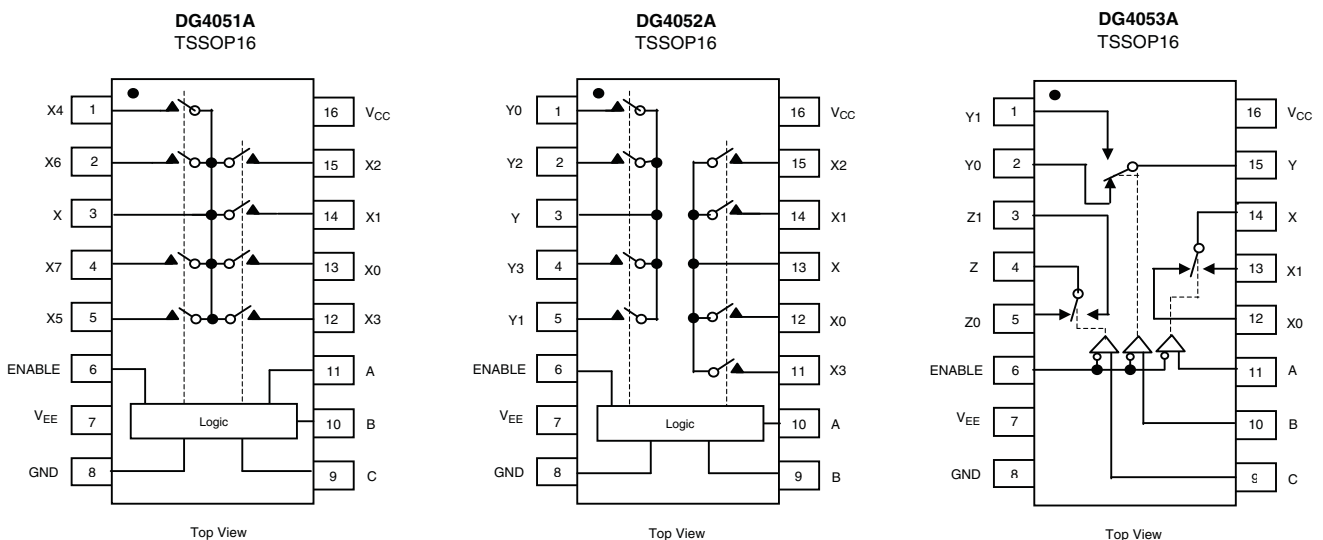

RoHS
COMPLIANT

APPLICATIONS

- Instruments
- Healthcare and medical equipments
- Touch panel
- Automated test equipment
- Automation and control
- High precision data acquisition
- Communication system

FUNCTIONAL BLOCK DIAGRAM AND PIN CONFIGURATION

ENABLE = LO, all switches are controlled by addr pins.
ENABLE = HI, all switches are off.

ORDERING INFORMATION		
Temp Range	Package	Part Number
DG4051A, DG4052A, DG4053A		
- 40 °C to 125 °C ^a	16-Pin TSSOP	DG4051AEQ-T1-E3 DG4052AEQ-T1-E3 DG4053AEQ-T1-E3
	16-Pin miniQFN	DG4051AEN-T1-E4 DG4052AEN-T1-E4 DG4053AEN-T1-E4

Notes:

a. - 40 °C to 85 °C datasheet limits apply.

ABSOLUTE MAXIMUM RATINGS $T_A = 25^\circ\text{C}$, unless otherwise noted			
Parameter	Limit	Unit	
V+ to V-	14	V	
GND to V-	7		
Digital Inputs ^a , V_S , V_D	(V-) - 0.3 to (V+) + 0.3 or 30 mA, whichever occurs first		
Continuous Current (Any terminal)	30	mA	
Peak Current, S or D (Pulsed 1 ms, 10 % duty cycle)	100		
Storage Temperature	- 65 to 150	$^\circ\text{C}$	
Power Dissipation ^b	16-Pin TSSOP ^c	450	mW
	16-Pin miniQFN ^{d, e}	525	
Thermal Resistance ^b	16-Pin TSSOP	178	$^\circ\text{C}/\text{W}$
	16-Pin miniQFN ^e	152	

Notes:

- a. Signals on SX, DX, or INX exceeding V+ or V- will be clamped by internal diodes. Limit forward diode current to maximum current ratings.
- b. All leads welded or soldered to PC board.
- c. Derate 5.6 mW/ $^\circ\text{C}$ above 70 $^\circ\text{C}$.
- d. Derate 6.6 mW/ $^\circ\text{C}$ above 70 $^\circ\text{C}$.
- e. Manual soldering with iron is not recommended for leadless components. The miniQFN-16 is a leadless package. The end of the lead terminal is exposed copper (not plated) as a result of the singulation process in manufacturing. A solder fillet at the exposed copper lip cannot be guaranteed and is not required to ensure adequate bottom side solder interconnection.

Notes:

- a. V_{IN} = input voltage to perform proper function.
- b. Room = 25 °C, Full = as determined by the operating temperature suffix.
- c. Typical values are for DESIGN AID ONLY, not guaranteed nor subject to production testing.
- d. The algebraic convention whereby the most negative value is a minimum and the most positive a maximum, is used in this data sheet.
- e. Guaranteed by design, not subject to production test.

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

Notes

- (1) Use millimeters as the primary measurement.
- (2) Dimensioning and tolerances conform to ASME Y14.5M. - 1994.
- (3) N is the number of terminals. Nd and Ne is the number of terminals in each D and E site respectively.
- (4) Dimensions b applies to plated terminal and is measured between 0.15 mm and 0.30 mm from terminal tip.
- (5) The pin 1 identifier must be existed on the top surface of the package by using identification mark or other feature of package body.
- (6) Package warpage max. 0.05 mm.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document or by any conduct of Vishay. Product names and markings noted herein may be trademarks of their respective owners.
