

## Link Replicator for Fibre Channel, Gigabit Ethernet, and HDTV Data Rates

Check for Samples: [SN65LVCP15](#)

### FEATURES

- Replicates Serial Links Such as Fibre Channel, Gigabit Ethernet, and HDTV Links
- T11 Fibre Channel Compliant at 1.0634 Gb/s
- IEEE802.3-2005 Gigabit Ethernet Compliant at 1.25 Gb/s (1000Base-X)
- Support for SMPTE-292M Data Rate at 1.485 Gb/s
- Compatible With VSC7132-01
- No External Components Required
- 0.455 W Maximum Power Dissipation
- 3.3 V Power Supply
- 28-Pin, 4,4 mm × 9,7 mm TSSOP Package
- Footprint Compatible with VSC7132

### APPLICATIONS

- Test Equipment
- Gigabit Ethernet and Fibre Channel Switches/Repeaters

### DESCRIPTION

The SN65LVCP15 is a high performance serial link mux for use in Fibre Channel (1.0625 Gb/s), Gigabit Ethernet (1.25 Gb/s), and other high speed interface applications. A common application involves a serializer/deserializer (SerDes), such as the TLK2201B, which would normally be connected to the IN $\pm$  and OUT $\pm$  ports in order to provide duplicate set of links on the IN0/OUT0 and IN1/OUT1 ports. This type of application is often used to implement high speed test ports that can be monitored without affecting the serial data stream of the application. A popular application is in Line Cards, that use serial links from a SerDes like TLK2201B ([SLLS585](#)), where the SN65LVCP15 provides redundant, hot-swappable links to redundant Switch Fabric Cards.

During normal operation, IN is sent to both OUT0 and OUT1 whose buffers are enabled when OE0 and OE1 are HIGH. OUT0 can select between IN and IN1. OUT1 can select between IN and IN0. OUT can select between IN0 and IN1.

In Link Replicator applications, such as the Line Card to Switch Card links, IN is transmitted to both OUT0 and OUT1 which either IN0 or IN1 is selected at OUT. In host Adapter applications, IN goes to OUT0 (an internal connector) which returns data and IN0 is looped to OUT1 (an external connector) which returns data on IN1 and then back to the SerDes on OUT.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

### ORDERING INFORMATION

ORDERABLE PART NUMBER	DESCRIPTION
SN65LVCP15PW <sup>(1)</sup>	28-Pin TSSOP, 4,4 mm x 9,7 mm Body

- (1) For the most current package and ordering information, see the Package Option Addendum at the end of this document, or see the TI website at [www.ti.com](http://www.ti.com).

### ABSOLUTE MAXIMUM RATINGS<sup>(1)</sup>

	VALUE	UNIT
$V_{DD}$ Power supply voltage, TTL	0.5 to 4.0	V
$V_{IN(P)}$ DC input voltage, PECL	-0.5 to $V_{DD} + 0.5$	V
$V_{IN(T)}$ DC input voltage, TTL	-0.5 to +5.5	V
$V_{IN(TTL)}$ DC voltage applied to outputs for high output state	-0.5 to $V_{DD} + 0.5$	V
ESD Electrostatic discharge voltage (human body model)	2	kV
$T_{JA}$ Junction to Ambient Thermal Resistance (Assumes High K Board)	61.7	°C/W

- (1) Stresses listed under absolute maximum ratings may be applied to devices one at a time without causing permanent damage. Functionality at or above the values listed is not implied. Exposure to these values for extended periods may affect device reliability.

### RECOMMENDED OPERATING CONDITIONS

	MIN	MAX	UNIT
$V_{DD}$ Power supply voltage	3.14	3.47	V
Operating temperature range	-40	85	°C

### AC ELECTRICAL CHARACTERISTICS

over recommended operating conditions (unless otherwise noted)

PARAMETER	TEST CONDITIONS	MIN	TYP	MAX	UNIT
f Operating frequency range		1		1.5	Gb/s
$t_1$ Flow-through propagation delay	Delay from any input to any output			1	ns
$t_r, t_f$ Serial data rise and fall time	20% to 80%			300	ps
$t_{DJ}$ Deterministic jitter added to serial input	1 Gb/s to 1.25 Gb/s. Measured on K28.5+, K28.5- pattern			35	ps pp
	1.25 Gb/s to 1.5 Gb/s. Measured on K28.5+, K28.5- pattern			45	

Figure 1. Timing Waveforms

## DC ELECTRICAL CHARACTERISTICS

over recommended operating conditions (unless otherwise noted)

PARAMETER		TEST CONDITIONS	MIN	TYP	MAX	UNIT
$V_{IH(TTL)}$	Input HIGH voltage		2	5.5		V
$V_{IL(TTL)}$	Input LOWS voltage		0	0.8		V
$I_{IH(TTL)}$	Input HIGH current	$V_{IN} = 2.4\text{ V}$	-100		100	$\mu\text{A}$
$I_{IL(TTL)}$	Input HIGH current	$V_{IN} = 0.5\text{ V}$	-100		100	$\mu\text{A}$
$V_{DD}$	Supply voltage	$V_{DD} = 3.30\text{ V} \pm 5\%$	3.14		3.47	V
$I_{DD}$	Supply current	Outputs open, $V_{DD} = V_{DD\text{ max}}$			131	mA
$P_D$	Power dissipation	Outputs open, $V_{DD} = V_{DD\text{ max}}$			455	mW
$\Delta V_{IN}$	Receiver differential peak-to-peak input sensitivity (IN, IN0, IN1)	AC coupled, Internally biased at $V_{DD}/2$	300		2600	mV <sub>PP</sub>
$\Delta V_{OUT50}$	Output differential peak-to-peak voltage swing (OUT, OUT0, OUT1)	50 $\Omega$ to $V_{DD} - 2\text{ V}$	1000		2200	mV <sub>PP</sub>
$\Delta V_{OUT75}$		75 $\Omega$ to $V_{DD} - 2\text{ V}$	1200		2200	mV <sub>PP</sub>

## APPLICATION EXAMPLE

R is 150  $\Omega$  for both 100  $\Omega$  differential or 150  $\Omega$  differential traces.

RT matches the differential impedance of the link.

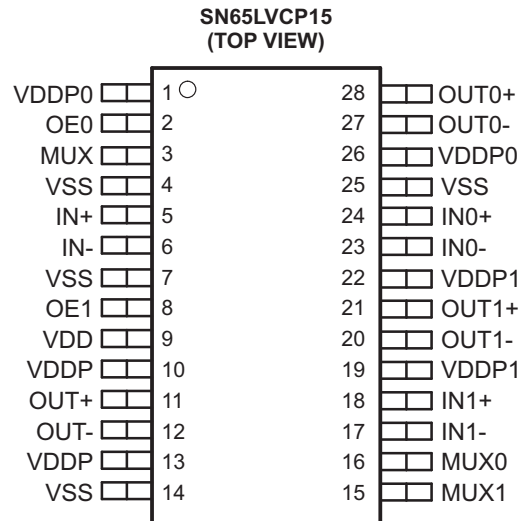

For optimal signal integrity performance, A/C coupling is recommended.

## PACKAGE INFORMATION – PIN DIAGRAM

### PIN FUNCTIONS

PIN		TYPE	LEVEL	DESCRIPTION
NO.	NAME			
5, 6 24, 23 18, 17	IN+, IN- IN0+, IN0- IN1+, IN1-	I	PECL	Differential (biased to $V_{DD}/2$ ) High-speed serial inputs
11, 12 28, 27 21, 20	OUT+, OUT- OUT0+, OUT0- OUT1+, OUT1-	O	PECL	Differential high-speed serial outputs
2 8	OE0 OE1	I	TTL	OE0/OE1 enables OUT0/OUT1 when HIGH. When LOW, OUTx is powered down and both OUTx+ and OUTx- float HIGH.
3	MUX	I	TTL	Determines source of OUT. Selects either IN0 (LOW) or IN1 (HIGH).
15	MUX1	I	TTL	Determines source of OUT1. Selects either IN (HIGH) or IN0 (LOW).
16	MUX0	I	TTL	Determines source of OUT0. Selects either IN (LOW) or IN1 (HIGH).
9	VDD	Pwr		3.3 V power supply for digital logic
10, 13 1, 26 19, 22	VDDP VDDP0 VDDP1	Pwr		High-speed output power supply: 3.3 V supply for PECL drivers. VDDP0 is for OUT0, VDDP1 is for OUT1, and VDDP1 is for OUT1.
4, 7 14, 25	VSS	Pwr		Ground

### MOISTURE SENSITIVITY LEVEL

This device is rated moisture sensitivity level 3 or better as specified in the joint IPC and JEDEC standard IPC/JEDEC J-STD-020. For more information, see the IPC and JEDEC standards.

---

**REVISION HISTORY****Changes from Original (October 2008) to Revision A** **Page**

- 
- Deleted  $I_O$  - DC output HIGH current, PECL from the ABSOLUTE MAXIMUM RATINGS table ..... 2
- 

**Changes from Revision A (November 2008) to Revision B** **Page**

- 
- Changed Case operating temperature To: Operating temperature range and the range From: 0 to 85°C To: –40 to 85°C ..... 2
-

**PACKAGING INFORMATION**

Orderable Device	Status (1)	Package Type	Package Drawing	Pins	Package Qty	Eco Plan (2)	Lead/Ball Finish (6)	MSL Peak Temp (3)	Op Temp (°C)	Device Marking (4/5)	Samples
SN65LVCP15PW	ACTIVE	TSSOP	PW	28	50	Green (RoHS & no Sb/Br)	CU NIPDAU	Level-1-260C-UNLIM	-40 to 85	LVCP15	<a href="#">Samples</a>
SN65LVCP15PWR	ACTIVE	TSSOP	PW	28	2000	Green (RoHS & no Sb/Br)	CU NIPDAU	Level-1-260C-UNLIM	-40 to 85	LVCP15	<a href="#">Samples</a>

(1) The marketing status values are defined as follows:

**ACTIVE:** Product device recommended for new designs.

**LIFEBUY:** TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

**NRND:** Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

**PREVIEW:** Device has been announced but is not in production. Samples may or may not be available.

**OBSOLETE:** TI has discontinued the production of the device.

(2) **RoHS:** TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".

**RoHS Exempt:** TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.

**Green:** TI defines "Green" to mean the content of Chlorine (Cl) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of <=1000ppm threshold. Antimony trioxide based flame retardants must also meet the <=1000ppm threshold requirement.

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead/Ball Finish - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead/Ball Finish values may wrap to two lines if the finish value exceeds the maximum column width.

**Important Information and Disclaimer:**The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

# MECHANICAL DATA

PW (R-PDSO-G28)

PLASTIC SMALL OUTLINE

4040064-7/G 02/11

- NOTES:
- A. All linear dimensions are in millimeters. Dimensioning and tolerancing per ASME Y14.5M-1994.
  - B. This drawing is subject to change without notice.
  -  C. Body length does not include mold flash, protrusions, or gate burrs. Mold flash, protrusions, or gate burrs shall not exceed 0,15 each side.
  -  D. Body width does not include interlead flash. Interlead flash shall not exceed 0,25 each side.
  - E. Falls within JEDEC MO-153

PW (R-PDSO-G28)

PLASTIC SMALL OUTLINE

- NOTES:
- A. All linear dimensions are in millimeters.
  - B. This drawing is subject to change without notice.
  - C. Publication IPC-7351 is recommended for alternate design.
  - D. Laser cutting apertures with trapezoidal walls and also rounding corners will offer better paste release. Customers should contact their board assembly site for stencil design recommendations. Refer to IPC-7525 for other stencil recommendations.
  - E. Customers should contact their board fabrication site for solder mask tolerances between and around signal pads.

## IMPORTANT NOTICE

Texas Instruments Incorporated (TI) reserves the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete.

TI's published terms of sale for semiconductor products (<http://www.ti.com/sc/docs/stdterms.htm>) apply to the sale of packaged integrated circuit products that TI has qualified and released to market. Additional terms may apply to the use or sale of other types of TI products and services.

Reproduction of significant portions of TI information in TI data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such reproduced documentation. Information of third parties may be subject to additional restrictions. Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyers and others who are developing systems that incorporate TI products (collectively, "Designers") understand and agree that Designers remain responsible for using their independent analysis, evaluation and judgment in designing their applications and that Designers have full and exclusive responsibility to assure the safety of Designers' applications and compliance of their applications (and of all TI products used in or for Designers' applications) with all applicable regulations, laws and other applicable requirements. Designer represents that, with respect to their applications, Designer has all the necessary expertise to create and implement safeguards that (1) anticipate dangerous consequences of failures, (2) monitor failures and their consequences, and (3) lessen the likelihood of failures that might cause harm and take appropriate actions. Designer agrees that prior to using or distributing any applications that include TI products, Designer will thoroughly test such applications and the functionality of such TI products as used in such applications.

TI's provision of technical, application or other design advice, quality characterization, reliability data or other services or information, including, but not limited to, reference designs and materials relating to evaluation modules, (collectively, "TI Resources") are intended to assist designers who are developing applications that incorporate TI products; by downloading, accessing or using TI Resources in any way, Designer (individually or, if Designer is acting on behalf of a company, Designer's company) agrees to use any particular TI Resource solely for this purpose and subject to the terms of this Notice.

TI's provision of TI Resources does not expand or otherwise alter TI's applicable published warranties or warranty disclaimers for TI products, and no additional obligations or liabilities arise from TI providing such TI Resources. TI reserves the right to make corrections, enhancements, improvements and other changes to its TI Resources. TI has not conducted any testing other than that specifically described in the published documentation for a particular TI Resource.

Designer is authorized to use, copy and modify any individual TI Resource only in connection with the development of applications that include the TI product(s) identified in such TI Resource. NO OTHER LICENSE, EXPRESS OR IMPLIED, BY ESTOPPEL OR OTHERWISE TO ANY OTHER TI INTELLECTUAL PROPERTY RIGHT, AND NO LICENSE TO ANY TECHNOLOGY OR INTELLECTUAL PROPERTY RIGHT OF TI OR ANY THIRD PARTY IS GRANTED HEREIN, including but not limited to any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information regarding or referencing third-party products or services does not constitute a license to use such products or services, or a warranty or endorsement thereof. Use of TI Resources may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

TI RESOURCES ARE PROVIDED "AS IS" AND WITH ALL FAULTS. TI DISCLAIMS ALL OTHER WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, REGARDING RESOURCES OR USE THEREOF, INCLUDING BUT NOT LIMITED TO ACCURACY OR COMPLETENESS, TITLE, ANY EPIDEMIC FAILURE WARRANTY AND ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT OF ANY THIRD PARTY INTELLECTUAL PROPERTY RIGHTS. TI SHALL NOT BE LIABLE FOR AND SHALL NOT DEFEND OR INDEMNIFY DESIGNER AGAINST ANY CLAIM, INCLUDING BUT NOT LIMITED TO ANY INFRINGEMENT CLAIM THAT RELATES TO OR IS BASED ON ANY COMBINATION OF PRODUCTS EVEN IF DESCRIBED IN TI RESOURCES OR OTHERWISE. IN NO EVENT SHALL TI BE LIABLE FOR ANY ACTUAL, DIRECT, SPECIAL, COLLATERAL, INDIRECT, PUNITIVE, INCIDENTAL, CONSEQUENTIAL OR EXEMPLARY DAMAGES IN CONNECTION WITH OR ARISING OUT OF TI RESOURCES OR USE THEREOF, AND REGARDLESS OF WHETHER TI HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Unless TI has explicitly designated an individual product as meeting the requirements of a particular industry standard (e.g., ISO/TS 16949 and ISO 26262), TI is not responsible for any failure to meet such industry standard requirements.

Where TI specifically promotes products as facilitating functional safety or as compliant with industry functional safety standards, such products are intended to help enable customers to design and create their own applications that meet applicable functional safety standards and requirements. Using products in an application does not by itself establish any safety features in the application. Designers must ensure compliance with safety-related requirements and standards applicable to their applications. Designer may not use any TI products in life-critical medical equipment unless authorized officers of the parties have executed a special contract specifically governing such use. Life-critical medical equipment is medical equipment where failure of such equipment would cause serious bodily injury or death (e.g., life support, pacemakers, defibrillators, heart pumps, neurostimulators, and implantables). Such equipment includes, without limitation, all medical devices identified by the U.S. Food and Drug Administration as Class III devices and equivalent classifications outside the U.S.

TI may expressly designate certain products as completing a particular qualification (e.g., Q100, Military Grade, or Enhanced Product). Designers agree that it has the necessary expertise to select the product with the appropriate qualification designation for their applications and that proper product selection is at Designers' own risk. Designers are solely responsible for compliance with all legal and regulatory requirements in connection with such selection.

Designer will fully indemnify TI and its representatives against any damages, costs, losses, and/or liabilities arising out of Designer's non-compliance with the terms and provisions of this Notice.
