Chip tantalum capacitors (Bottom surface electrode type : Large capacitance)

TCT series AL case Datasheet

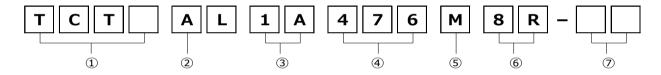

Features

- 1) Bottom electrode configuration results in significantly greater compactness.
- 2) Filet formation enables easy visibility after mounting.
- 3) Ideal for noise removal on power supply lines with limited space.
- 4) Eco-friendly halogen-free products.

Dimensions

Part No. Explanation

- ① Series name TCT
- 2 Case style

AL: 3216-3216(12)size

3 Rated voltage

riaioa ronagi	,
CODE	Rated voltage(V)
0E	2.5
0G	4
0J	6.3
1A	10
1C	16
1D	20
1E	25
1V	35
1H	50

- 4 Nominal capacitance
 - Nominal capacitance in pF in 3 digits:
 - 2 significant figures followed by the figure representing the number of 0's.
- (5) Capacitance tolerance

M: ±20%

- 6 Taping
 - 8: Tape width

R: Positive electrode on the side opposite to sprocket hole

7 Discrimination code

Marking

The indications listed below should be given on the surface of a capacitor.

- (1) Polarity: The polarity should be shown by bar. (on the anode side)
- (2) Rated DC voltage: A voltage code is shown as below table.
- (3) Capacitance: A capacitance code is shown as below table.

Voltago Codo	Rated DC				
Voltage Code	Voltage (V)				
е	2.5				
g	4				
j	6.3				
Α	10				
С	16				
D	20				
E	25				
V	35				
Н	50				

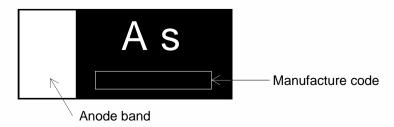

Capacitance	Nominal	Capacitance	Nominal
Code	Capacitance (µF)	Code	Capacitance (µF)
<u>E</u>	0.15	е	15
<u>N</u>	0.33	j	22
<u>s</u>	0.47	n	33
А	1.0	S	47

J	2.2	а	100
N	3.3	e	150
S	4.7	j	220
W	6.8	c	330
а	10	s	470

Visual typical example

voltage code and capacitance code are variable with parts number.

[TCT series AL case]

- (1) voltage code
- (2) capacitance code

Characteristics

Item		Performance	Test conditions (based on JIS C 5101-1 and JIS C 5101-3)						
Operating Temp	erature	-55°C~+125°C	Voltage reduction when temperature exceeds +85°C						
Maximum operate temperature with voltage derating	•	+85℃							
Rated voltage (V	'.DC)	Refer to " Standard list ".	at 85℃						
Category voltage		Refer to " Standard list ".	at 125°C						
Surge voltage (V		Refer to " Standard list ".	at 85℃						
DC Leakage cur	•	Shall be satisfied the value on	As per 4.9 JIS C 5101-1						
		" Standard list ".	As per 4.5.1 JIS C 5101-3						
			Voltage : Rated voltage for 5min						
Capacitance tolerance		Shall be satisfied allowance range.	As per 4.7 JIS C 5101-1						
•		±20%	As per 4.5.2 JIS C 5101-3						
			Measuring frequency :120 ± 12Hz						
			Measuring voltage :0.5Vrms + 1.5V.DC						
			Measuring circuit :DC Equivalent series circui						
Tangent of loss	angle	Shall be satisfied the value on	As per 4.8 JIS C 5101-1						
(Df,tanδ)	-	" Standard list ".	As per 4.5.3 JIS C 5101-3						
			Measuring frequency :120 ± 12Hz						
			Measuring voltage :0.5Vrms + 1.5V.DC						
			Measuring circuit :DC Equivalent series circui						
Impedance		Shall be satisfied the value on	As per 4.10 JIS C 5101-1						
·		" Standard list ".	As per 4.5.4 JIS C 5101-3						
			Measuring frequency :100 ± 10kHz						
			Measuring voltage :0.5Vrms or less						
			Measuring circuit :DC Equivalent series circui						
Resistance to	Appe-	There should be no significant	As per 4.14 JIS C 5101-1						
Soldering	arance	abnormality.	As per 4.6 JIS C 5101-3						
heat		The indications should be clear.	Dip in the solder bath						
	L.C.	Less than 200% of initial limit.	Solder temp :240 ± 5°C						
			Duration :10 ± 0.5s						
	⊿C/C	Within +20/-30% of initial value.	Repetition :1						
			After the specimens, leave it at room temperature						
	DF	Less than 200% of initial limit.	for over 24h and then measure the sample.						
	(tanδ)								
Temperature	Appe-	There should be no significant	As per 4.16 JIS C 5101-1						
cycle	arance	abnormality.	As per 4.10 JIS C 5101-3						
		The indications should be clear.	Repetition : 5 cycles						
	L.C.	Less than 200% of initial limit.	(1 cycle : steps 1 to 4) without discontinuation.						
			Temp. Time						
	⊿C/C	Within ±30% of initial value.	1 -55±3°C 30±3min						
	55	1 0000 1 11 11 11	2 Room Temp. 3min or less						
	DF (1 5)	Less than 200% of initial limit.	3 125±2℃ 30±3min						
	(tanδ)		4 Room Temp. 3min or less						
			After the specimens, leave it at room temperature						
			for over 24h and then measure the sample.						
			Initial value for ∠C/C shall be the value after						
			mounted.						

Item		Performance	Test conditions (based on JIS C 5101-1 and JIS C 5101-3)

Notes

- 1) The information contained herein is subject to change without notice.
- Before you use our Products, please contact our sales representative and verify the latest specifications.
- 3) Although ROHM is continuously working to improve product reliability and quality, semiconductors can break down and malfunction due to various factors. Therefore, in order to prevent personal injury or fire arising from failure, please take safety measures such as complying with the derating characteristics, implementing redundant and fire prevention designs, and utilizing backups and fail-safe procedures. ROHM shall have no responsibility for any damages arising out of the use of our Poducts beyond the rating specified by ROHM.
- 4) Examples of application circuits, circuit constants and any other information contained herein are provided only to illustrate the standard usage and operations of the Products. The peripheral conditions must be taken into account when designing circuits for mass production.
- 5) The technical information specified herein is intended only to show the typical functions of and examples of application circuits for the Products. ROHM does not grant you, explicitly or implicitly, any license to use or exercise intellectual property or other rights held by ROHM or any other parties. ROHM shall have no responsibility whatsoever for any dispute arising out of the use of such technical information.
- 6) The Products are intended for use in general electronic equipment (i.e. AV/OA devices, communication, consumer systems, gaming/entertainment sets) as well as the applications indicated in this document.
- 7) The Products specified in this document are not designed to be radiation tolerant.
- 8) For use of our Products in applications requiring a high degree of reliability (as exemplified below), please contact and consult with a ROHM representative : transportation equipment (i.e. cars, ships, trains), primary communication equipment, traffic lights, fire/crime prevention, safety equipment, medical systems, servers, solar cells, and power transmission systems.
- Do not use our Products in applications requiring extremely high reliability, such as aerospace equipment, nuclear power control systems, and submarine repeaters.
- 10) ROHM shall have no responsibility for any damages or injury arising from non-compliance with the recommended usage conditions and specifications contained herein.
- 11) ROHM has used reasonable care to ensure the accuracy of the information contained in this document. However, ROHM does not warrants that such information is error-free, and ROHM shall have no responsibility for any damages arising from any inaccuracy or misprint of such information.
- 12) Please use the Products in accordance with any applicable environmental laws and regulations, such as the RoHS Directive. For more details, including RoHS compatibility, please contact a ROHM sales office. ROHM shall have no responsibility for any damages or losses resulting non-compliance with any applicable laws or regulations.
- 13) When providing our Products and technologies contained in this document to other countries, you must abide by the procedures and provisions stipulated in all applicable export laws and regulations, including without limitation the US Export Administration Regulations and the Foreign Exchange and Foreign Trade Act.
- 14) This document, in part or in whole, may not be reprinted or reproduced without prior consent of ROHM.

Thank you for your accessing to ROHM product informations. More detail product informations and catalogs are available, please contact us.

General Precaution

- 1. Before you use our Products, you are requested to carefully read this document and fully understand its contents. ROHM shall not be in any way responsible or liable for failure, malfunction or accident arising from the use of any ROHM's Products against warning, caution or note contained in this document.
- 2. All information contained in this document is current as of the issuing date and subject to change without any prior notice. Before purchasing or using ROHM's Products, please confirm the latest information with a ROHM sales representative.
- 3. The information contained in this document is provided on an "as is" basis and ROHM does not warrant that all information contained in this document is accurate and/or error-free. ROHM shall not be in any way responsible or liable for any damages, expenses or losses incurred by you or third parties resulting from inaccuracy or errors of or concerning such information.
