6.25-Gbps Cable and PC Board Equalizer

Check for Samples: TLK6201EA

FEATURES

- **Multirate Operation up to 6.25 Gbps**
- **Compensates for up to 13-dB Loss on the Receive Side and up to 12-dB Loss on the Transmit Side at 3.125 GHz**
- **Suitable to Receive and Transmit 6.25-Gbps Data Over up to 60 Inches (1.5 Meters) of FR4 PC Boards**
- **Suitable to Receive and Transmit 6.25-Gbps Data Over up to 63 Feet (19.2 Meters) of 24-AWG Cable**
- **Ultralow Power Consumption**
- **Input Offset Cancellation**
- **High Input Dynamic Range**
- **Output Disable/Squelch Function**
- **Loss of Signal Detection**
- **Output Swing Select**
- **Output De-Emphasis Select**
- **Output Polarity Select**
- **CML Data Outputs**
- **Single 3.3-V Supply**
- **Surface-Mount, Small-Footprint, 3-mm × 3-mm, 16-Pin QFN Package**

APPLICATIONS

- **High-Speed Links in Communication and Data Systems**
- **Backplane, Daughtercard, and Cable Interconnects for PCI Express, InfiniBand, SAS, CEI, XAUI, Fibre Channel, and Ethernet**

DESCRIPTION

The TLK6201EA is a versatile, high-speed, limiting equalizer for applications in digital high-speed links with data rates up to 6.25 Gbps.

This device provides a high-frequency boost of 13 dB on the received data at 3.125 GHz, as well as sufficient gain to ensure a fully differential output swing for input signals as low as 100 mVp-p (at the input of a lossy interconnect line).

Four de-emphasis levels can be selected on the transmit side to provide up to 12 dB of additional high-frequency loss compensation.

The high input-signal dynamic range ensures low-jitter output signals even when overdriven with input signal swings as high as 2000 mVp-p.

The TLK6201EA implements fixed loss-of-signal detection, which can be used to implement a squelch function by connecting the LOS output to the adjacent DIS input.

The TLK6201EA is available in a small-footprint, 3-mm × 3-mm, 16-pin QFN package. It requires a single 3.3-V supply.

This power-efficient equalizer is characterized for operation from –40°C to 85°C.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of the Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

Copyright © 2006–2011, Texas Instruments Incorporated

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

BLOCK DIAGRAM

A simplified block diagram of the TLK6201EA is shown in Figure 1. This compact, low-power, 6.25-Gbps equalizer consists of a high-speed data path with offset cancellation circuitry, a loss-of-signal detection block, and a band-gap voltage reference and bias current generation block. The equalizer requires a single 3.3-V ±10% supply voltage. All circuit parts are described in detail as follows.

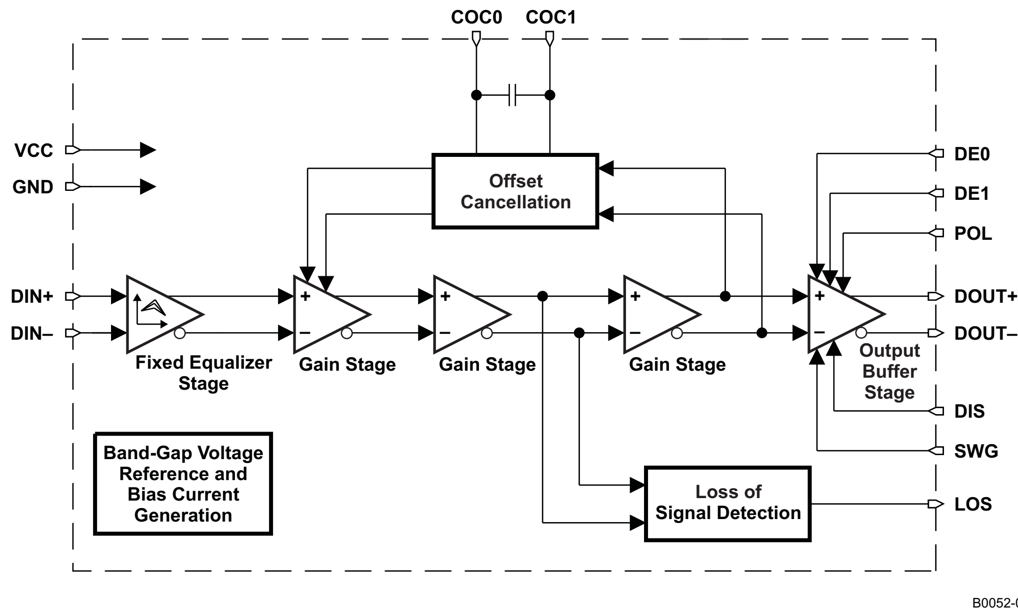

Figure 1. Simplified Block Diagram of the TLK6201EA

HIGH-SPEED DATA PATH

The high-speed data signal with frequency-dependent loss is applied to the data path by means of the input signal pins DIN+/DIN–. The data path consists of the fixed equalizer input stage, three gain stages which provide the required gain to ensure a limited-output signal, and an output buffer stage. The equalized and amplified data output signal is available at the output pins DOUT+/DOUT–, which provide 2 × 50-Ω back-termination to VCC. The output stage also includes a data polarity-switching function, which is controlled by the POL input, and a disable function, controlled by the signal applied to the DIS input pin.

The output swing can be increased 50% by applying a high-level signal to the SWG pin.

Up to 12 dB of output signal de-emphasis can be selected using the pins DE0 and DE1.

An offset cancellation compensates the inevitable internal offset voltages and thus ensures proper operation even for very small input data signals.

The low-frequency cutoff is as low as 3.5 kHz with the built-in filter capacitor. For applications which require even lower cutoff frequencies, an additional external filter capacitor can be connected to the COC0/COC1 pins.

LOSS-OF-SIGNAL DETECTION

The output signal of the second gain stage is monitored by the loss-of-signal detection circuitry. In this block, the input signal is compared to a fixed threshold. If the low frequency components of the input signal fall below this threshold, a loss of signal is indicated at the LOS pin.

A squelch function can be easily implemented by connecting the LOS output to the adjacent DIS input. This measure avoids chattering of the output when no input signal is present.

Copyright © 2006–2011, Texas Instruments Incorporated

BAND-GAP VOLTAGE AND BIAS GENERATION

The TLK6201EA equalizer is supplied by a single 3.3-V ±10% supply voltage connected to the VCC pins. This voltage is referred to ground (GND).

An on-chip band-gap voltage circuit generates a supply-voltage-independent reference from which all internally required voltages and bias currents are derived.

DEVICE INFORMATION

The TLK6201EA is available in a small-footprint, 3-mm × 3-mm, 16-pin QFN package, with a lead pitch of 0.5 mm. The pinout is shown in Figure 2.

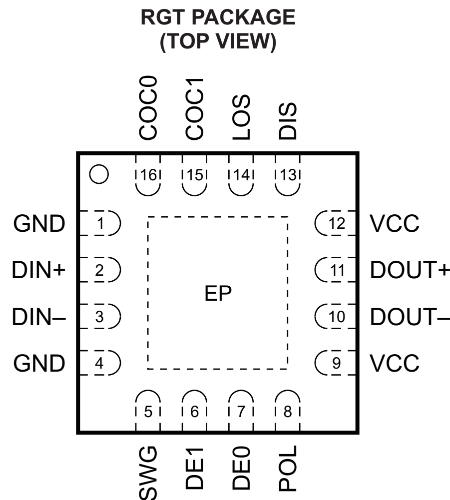

Figure 2. Pinout of TLK6201EA

Table 1. PIN FUNCTIONS

PIN		TYPE	DESCRIPTION
NAME	NO.		
COC0	16	Analog	Offset cancellation filter capacitor terminal 2. Connect an additional filter capacitor between this pin and COC1 (pin 15). To disable the offset cancellation loop, connect COC1 and COC0 (pins 15 and 16).
COC1	15	Analog	Offset cancellation filter capacitor terminal 1. Connect an additional filter capacitor between this pin and COC0 (pin 16). To disable the offset cancellation loop, connect COC1 and COC0 (pins 15 and 16).
DE0	7	CMOS in	Selects 4 dB of output signal de-emphasis when set to high level. Internally pulled up.
DE1	6	CMOS in	Selects 8 dB of output signal de-emphasis when set to high level. Internally pulled up.
DIN+	2	Analog in	Noninverted data input. On-chip load terminated to ground. Connect a 100-Ω differential transmission line to terminals DIN+ and DIN–.
DIN–	3	Analog in	Inverted data input. On-chip load terminated to ground. Connect a 100-Ω differential transmission line to terminals DIN+ and DIN–.
DIS	13	CMOS in	Disables CML output stage when set to high level. Internally pulled down.
DOUT+	11	CML out	Noninverted data output. On-chip 50-Ω back-terminated to VCC.
DOUT–	10	CML out	Inverted data output. On-chip 50-Ω back-terminated to VCC.
GND	1, 4, EP	Supply	Circuit ground. Exposed die pad (EP) must be grounded.
LOS	14	CMOS out	High level indicates that the input signal amplitude is below the fixed threshold level.
POL	8	CMOS in	Output data signal polarity select (internally pulled up): Setting to high level or leaving pin open selects normal polarity. Low level selects inverted polarity.
SWG	5	CMOS in	Output swing control. The output swing is increased by 50% when set to high level. Internally pulled down.
VCC	9, 12	Supply	3.3-V, ±10% supply voltage

ABSOLUTE MAXIMUM RATINGS

over operating free-air temperature range (unless otherwise noted) [1]

		VALUE[1]	UNIT
V_{CC}	Supply voltage [2]	–0.3 to 4	V
V_{DIN+}, $V_{DIN–}$	Voltage at DIN+, DIN– [2]	0.5 to 4	V
V_{DIS}, V_{POL}, V_{DE1}, V_{DE0}, V_{SWG}, V_{COC1}, V_{COC0}	Voltage at DIS, POL, DE1, DE0, SWG, COC1, COC0 [2]	–0.3 to 4	V
$V_{COC,DIFF}$	Differential input voltage between COC1 and COC0	±1	V
$V_{DIN,DIFF}$	Differential input voltage between DIN+ and DIN–	±2.5	V
I_{DIN+}, $I_{DIN–}$, I_{DOUT+}, $I_{DOUT–}$	Continuous current at inputs and outputs	±25	mA
ESD	ESD ratings at all pins, human body model (HBM)	3	kV
$T_{J,max}$	Maximum junction temperature	125	°C
T_{stg}	Storage temperature range	–65 to 150	°C
T_A	Characterized free-air operating temperature range	–40 to 85	°C

(1) Stresses beyond those listed under *Absolute Maximum Ratings* may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under *Recommended Operating Conditions* is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
(2) All voltage values are with respect to network ground terminal.

RECOMMENDED OPERATING CONDITIONS

over operating free-air temperature range (unless otherwise noted)

		MIN	NOM	MAX	UNIT
V_{CC}	Supply voltage	3	3.3	3.6	V
T_A	Free-air operating temperature	–40		85	°C
V_{IH}	High-level input voltage, CMOS	2			V
V_{IL}	Low-level input voltage, CMOS			0.8	V

DC ELECTRICAL CHARACTERISTICS

over recommended operating conditions (unless otherwise noted)

PARAMETER		TEST CONDITIONS	MIN	TYP	MAX	UNIT
V_{CC}	Supply voltage		3	3.3	3.6	V
I_{CC}	Supply current	DIS = SWG = low (includes CML output current)		45	54	mA
		DIS = low, SWG = high (includes CML output current)		55	67	
R_{OUT}	Output resistance, data	Single-ended to V_{CC}		50		Ω
	LOS high voltage	I_{source} = 1 mA	2.5			V
	LOS low voltage	I_{sink} = 1 mA			0.5	V

AC ELECTRICAL CHARACTERISTICS

over operating free-air temperature range (unless otherwise noted)
Typical operating condition is at V_{CC} = 3.3 V and T_A = 25°C.

	PARAMETER	TEST CONDITIONS	MIN	TYP	MAX	UNIT
	Low frequency –3-dB bandwidth	C_{OC} = open		3.5	10	kHz
		C_{OC} = 100 nF		0.8		
	Maximum data rate		6.25			Gbps
$V_{IN,MIN}$	Data input sensitivity(1)	BER < 10^{-12}, K28.5 pattern at 6.25 Gbps over a 36-inch, 7-mil-wide stripline on standard FR4, including two through-hole SMA connectors. Voltage measured at the input of the interconnect line.		40	50	mV_{P-P}
$V_{IN,MAX}$	Data input overload	Voltage at the input of an interconnect line	2000			mV_{P-P}
	High-frequency boost	f = 3.125 GHz (fixed input equalizer)	12	14	17	dB
V_{OD}	Differential data output voltage swing	DIS = low, SWG = low	600	800	1000	mV_{P-P}
		DIS = low, SWG = high	900	1200	1500	
V_{RIP}	Differential output ripple	DIS = high, 50% transitions of K28.5 pattern at 6.25 Gbps, no interconnect line, V_{IN} = 2000 mVp-p		0.25	10	mV_{RMS}
$V_{CM,OUT}$	Data output, common-mode voltage	DIS = low, SWG = low, dc-coupled 50 Ω to V_{CC}, single-ended terminations	V_{CC} – 0.25	V_{CC} – 0.2	V_{CC} – 0.15	V
		DIS = low, SWG = high, dc-coupled 50 Ω to V_{CC}, single-ended terminations	V_{CC} – 0.375	V_{CC} – 0.3	V_{CC} – 0.225	
DE	Output de-emphasis (see Figure 3)	DE0 = low, DE1 = low		0		dB
		DE0 = high, DE1 = low		–4		
		DE0 = low, DE1 = high		–8		
		DE0 = high, DE1 = high		–12		
DJ	Deterministic jitter	K28.5 pattern at 6.25 Gbps, no interconnect line, V_{IN} = 400 mVp-p, DE0 = low, DE1 = low, SWG = low		8		ps_{P-P}
		K28.5 pattern at 6.25 Gbps over a 36-inch, 7-mil-wide stripline on standard FR4 including two through-hole SMA connectors, V_{IN} = 400 mVp-p (voltage at the input of the interconnect line), DE0 = low, DE1 = low, SWG = low		12		
RJ	Random jitter	K28.5 pattern at 6.25 Gbps over a 36-inch, 7-mil-wide stripline on standard FR4 including two through-hole SMA connectors, V_{IN} = 400 mVp-p (voltage at the input of the interconnect line), DE0 = low, DE1 = low, SWG = low		1		ps_{RMS}
t_r	Output rise time	20% to 80%, no interconnect line, DE0 = low, DE1 = low		35	55	ps
t_f	Output fall time	20% to 80%, no interconnect line, DE0 = low, DE1 = low		35	55	ps
S11	Input return loss	10 Hz < f < 3.1 GHz		–15		dB
S22	Output return loss	10 Hz < f < 3.1 GHz		–12		dB

(1) The given differential input signal swing is valid for the low-frequency components of the input signal. The high-frequency components may be attenuated by up to 13 dB at 3.125 GHz.

AC ELECTRICAL CHARACTERISTICS (continued)

over operating free-air temperature range (unless otherwise noted)
Typical operating condition is at V_{CC} = 3.3 V and T_A = 25°C.

PARAMETER		TEST CONDITIONS	MIN	TYP	MAX	UNIT
V_{AS}	LOS assert threshold voltage	K28.5 pattern at 6.25 Gbps over a 36-inch, 7-mil-wide stripline on standard FR4 including two through-hole SMA connectors. Voltage measured at the input of the interconnect line. (2)	40	75		mV_{P-P}
V_{DAS}	LOS de-assert threshold voltage	K28.5 pattern at 6.25 Gbps over a 36-inch, 7-mil-wide stripline on standard FR4 including two through-hole SMA connectors. Voltage measured at the input of the interconnect line. (2)		130	250	mV_{P-P}
	LOS hysteresis	20 log(V_{DAS}/V_{AS}) (2)	2	4.5		dB
$t_{AS/DAS}$	LOS assert/de-assert time		2		100	μs
t_{DIS}	Disable response time			20		ns
	Latency	From DIN+/DIN– to DOUT+/DOUT–		150		ps

(2) This specification is for 0°C to 85°C. Depending on the interconnect line length and performance, the bit pattern, and the data rate, the assert and de-assert threshold voltage levels vary. For more information, see the *Typical Characteristics* section.

APPLICATION INFORMATION

Figure 4 shows the TLK6201EA connected with an ac-coupled interface to the data signal source via a stripline transmission line on FR4 material. The output load is ac-coupled as well.

The ac-coupling capacitors C_1 through C_4 in the input and output data signal lines are the only required external components. In addition, if a very low cutoff frequency is required, as an option, an external filter capacitor C_{OC} may be used.

(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

(2) **RoHS:** TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".
RoHS Exempt: TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.
Green: TI defines "Green" to mean the content of Chlorine (Cl) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of <=1000ppm threshold. Antimony trioxide based flame retardants must also meet the <=1000ppm threshold requirement.

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead/Ball Finish - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead/Ball Finish values may wrap to two lines if the finish value exceeds the maximum column width.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and

continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals.
TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

- F. Falls within JEDEC MO–220.

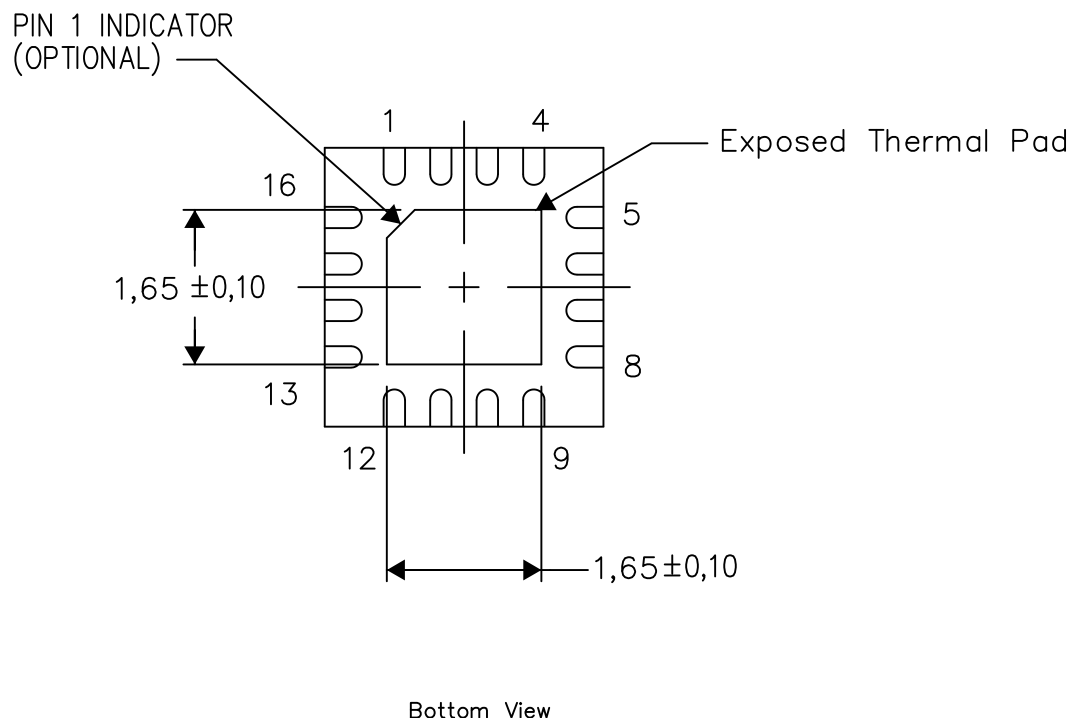
RGT (S–PVQFN–N16) PLASTIC QUAD FLATPACK NO–LEAD

THERMAL INFORMATION

This package incorporates an exposed thermal pad that is designed to be attached directly to an external heatsink. The thermal pad must be soldered directly to the printed circuit board (PCB). After soldering, the PCB can be used as a heatsink. In addition, through the use of thermal vias, the thermal pad can be attached directly to the appropriate copper plane shown in the electrical schematic for the device, or alternatively, can be attached to a special heatsink structure designed into the PCB. This design optimizes the heat transfer from the integrated circuit (IC).

For information on the Quad Flatpack No–Lead (QFN) package and its advantages, refer to Application Report, QFN/SON PCB Attachment, Texas Instruments Literature No. SLUA271. This document is available at www.ti.com.

The exposed thermal pad dimensions for this package are shown in the following illustration.



Exposed Thermal Pad Dimensions

4206349-7/Z 08/15

NOTE: All linear dimensions are in millimeters

IMPORTANT NOTICE

Texas Instruments Incorporated (TI) reserves the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete.

TI's published terms of sale for semiconductor products (http://www.ti.com/sc/docs/stdterms.htm) apply to the sale of packaged integrated circuit products that TI has qualified and released to market. Additional terms may apply to the use or sale of other types of TI products and services.

Reproduction of significant portions of TI information in TI data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such reproduced documentation. Information of third parties may be subject to additional restrictions. Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyers and others who are developing systems that incorporate TI products (collectively, “Designers”) understand and agree that Designers remain responsible for using their independent analysis, evaluation and judgment in designing their applications and that Designers have full and exclusive responsibility to assure the safety of Designers' applications and compliance of their applications (and of all TI products used in or for Designers’ applications) with all applicable regulations, laws and other applicable requirements. Designer represents that, with respect to their applications, Designer has all the necessary expertise to create and implement safeguards that (1) anticipate dangerous consequences of failures, (2) monitor failures and their consequences, and (3) lessen the likelihood of failures that might cause harm and take appropriate actions. Designer agrees that prior to using or distributing any applications that include TI products, Designer will thoroughly test such applications and the functionality of such TI products as used in such applications.

TI's provision of technical, application or other design advice, quality characterization, reliability data or other services or information, including, but not limited to, reference designs and materials relating to evaluation modules, (collectively, “TI Resources”) are intended to assist designers who are developing applications that incorporate TI products; by downloading, accessing or using TI Resources in any way, Designer (individually or, if Designer is acting on behalf of a company, Designer’s company) agrees to use any particular TI Resource solely for this purpose and subject to the terms of this Notice.

TI's provision of TI Resources does not expand or otherwise alter TI's applicable published warranties or warranty disclaimers for TI products, and no additional obligations or liabilities arise from TI providing such TI Resources. TI reserves the right to make corrections, enhancements, improvements and other changes to its TI Resources. TI has not conducted any testing other than that specifically described in the published documentation for a particular TI Resource.

Designer is authorized to use, copy and modify any individual TI Resource only in connection with the development of applications that include the TI product(s) identified in such TI Resource. NO OTHER LICENSE, EXPRESS OR IMPLIED, BY ESTOPPEL OR OTHERWISE TO ANY OTHER TI INTELLECTUAL PROPERTY RIGHT, AND NO LICENSE TO ANY TECHNOLOGY OR INTELLECTUAL PROPERTY RIGHT OF TI OR ANY THIRD PARTY IS GRANTED HEREIN, including but not limited to any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information regarding or referencing third-party products or services does not constitute a license to use such products or services, or a warranty or endorsement thereof. Use of TI Resources may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

TI RESOURCES ARE PROVIDED “AS IS” AND WITH ALL FAULTS. TI DISCLAIMS ALL OTHER WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, REGARDING RESOURCES OR USE THEREOF, INCLUDING BUT NOT LIMITED TO ACCURACY OR COMPLETENESS, TITLE, ANY EPIDEMIC FAILURE WARRANTY AND ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT OF ANY THIRD PARTY INTELLECTUAL PROPERTY RIGHTS. TI SHALL NOT BE LIABLE FOR AND SHALL NOT DEFEND OR INDEMNIFY DESIGNER AGAINST ANY CLAIM, INCLUDING BUT NOT LIMITED TO ANY INFRINGEMENT CLAIM THAT RELATES TO OR IS BASED ON ANY COMBINATION OF PRODUCTS EVEN IF DESCRIBED IN TI RESOURCES OR OTHERWISE. IN NO EVENT SHALL TI BE LIABLE FOR ANY ACTUAL, DIRECT, SPECIAL, COLLATERAL, INDIRECT, PUNITIVE, INCIDENTAL, CONSEQUENTIAL OR EXEMPLARY DAMAGES IN CONNECTION WITH OR ARISING OUT OF TI RESOURCES OR USE THEREOF, AND REGARDLESS OF WHETHER TI HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Unless TI has explicitly designated an individual product as meeting the requirements of a particular industry standard (e.g., ISO/TS 16949 and ISO 26262), TI is not responsible for any failure to meet such industry standard requirements.

Where TI specifically promotes products as facilitating functional safety or as compliant with industry functional safety standards, such products are intended to help enable customers to design and create their own applications that meet applicable functional safety standards and requirements. Using products in an application does not by itself establish any safety features in the application. Designers must ensure compliance with safety-related requirements and standards applicable to their applications. Designer may not use any TI products in life-critical medical equipment unless authorized officers of the parties have executed a special contract specifically governing such use. Life-critical medical equipment is medical equipment where failure of such equipment would cause serious bodily injury or death (e.g., life support, pacemakers, defibrillators, heart pumps, neurostimulators, and implantables). Such equipment includes, without limitation, all medical devices identified by the U.S. Food and Drug Administration as Class III devices and equivalent classifications outside the U.S.

TI may expressly designate certain products as completing a particular qualification (e.g., Q100, Military Grade, or Enhanced Product). Designers agree that it has the necessary expertise to select the product with the appropriate qualification designation for their applications and that proper product selection is at Designers’ own risk. Designers are solely responsible for compliance with all legal and regulatory requirements in connection with such selection.

Designer will fully indemnify TI and its representatives against any damages, costs, losses, and/or liabilities arising out of Designer’s non-compliance with the terms and provisions of this Notice.
